

# SASM 3.0

Standard Application for School Management

SASM 3.0 is a complete School & Hostel Automation System. It manages almost all kinds of activities related to a school including the residential schools.

The product has been developed in such a way that all or most of the activities of any school can be managed and school can implement it without any problem.

It lets you become complete a computerized school where all the activities are managed by computer and any kinds of reports can be generated with a few clicks of mouse. You will be glad to know the kind of report generation it can handle and amazed to see its working functionality.

The next page answers some of the basic queries that may be in your mind.

Thank You.

# A Glimpse of Queries

## Can it maintain attendance of every student?

Yes. It can maintain attendance of every student in your familiar attendance register format. You get list of student on left part and whole month column to fill in automatic or manual attendance. You can also maintain daily activity report of every student if needed.

Month	Year	Whole Session
August	2006	<input type="checkbox"/>
